

Volunteers Needed for Research Study

Study for healthy adults (age 50+) and adults with diabetic peripheral neuropathy

What to expect:

1. Two sessions of data collection
2. During the first session you will perform normal daily activity like sitting and standing
3. During the second session an MRI of your leg nerves will be obtained.

Volunteers will receive compensation of \$50

Are you eligible?

Adults with diabetic peripheral neuropathy

- Age: 50 years and above
- Have type II diabetes and peripheral neuropathy
- Do not have foot ulcer
- Ability to walk or stand independently

Healthy adults:

- Age: 50 years and above
- Ability to walk and stand independently
- Do not have history of neuromuscular disorder
