

Are you an adult who has had a stroke?

Are you interested in participating in rehabilitation research studies?

We are recruiting adults who have had a stroke to participate in the **University of Texas Stroke Research Registry.**

The purpose of this registry is to maintain a list of individuals who are interested in participating in stroke rehabilitation research studies at the University of Texas at Austin.

If you choose to participate, you will complete a short survey that asks about your stroke and your contact information. You may be contacted in the future by researchers who are studying stroke rehabilitation.

Interested? Visit the following website to participate:
